

You're Invited on an
Exclusive Tour of Kodak
during IPMA's 2009 Conference

Enjoy a special VIP tour of Kodak's demonstration facility, where you'll see the latest digital printing, prepress, and document scanning technologies, including an in-depth look at the exciting NexPress Dimensional Printing technology.

The tour will be conducted on Wednesday morning, June 10, during IPMA's 2009 Conference in Rochester, NY.

Keynote Presenter Elaine Wilde
Kodak's VP of Sales (US&C)

Did you know a recent study by PRIMIR identified the in-plant market as the #1 install base for digital electrophotographic printers? With adoption climbing above 85% on these devices, some in-plants are eyeing the next big print technology -- high speed inkjet.

Join Kodak for an information-packed educational session on high-speed inkjet printing and discover the opportunities this technology will create for in-plant print providers.

Learn about:

- Key applications
- Successful in-plant case studies
- Plus the latest updates on the new Kodak Stream inkjet technology

Elaine Wilde, Vice President of Sales, United States and Canada, Digital Printing Solutions, Kodak's Graphic Communication's Group, will serve as Keynote Presenter for this special event. Since joining Xerox in 1976, she has held a variety of sales, marketing, and general management positions including Senior Vice President & General Manager for Worldwide Graphic Arts, Vice President of Marketing & Strategy for Public Sector Operations, and Vice President of Integrated Document and Industry Solutions.

Ms. Wilde has a personal passion for this marketplace and tremendous respect for the customers who have led the way in the technology transformation of this industry. As leader of U.S. industry marketing in 1994, she created Graphic Arts Marketing Managers, a graphic arts customer council and a customized business strategy for this market to support industry focused applications. As the Vice President of Solutions and Services Business, she led the development and deployment of Production and Print Solutions for the Commercial Printer. Now at Kodak, she is leading the transition of the US&C product sales force to a Digital Printing Solutions sales force to include Inkjet, Workflow and Electrostatic technologies.
